	1/3 Bar	1	1	1	-	1

Other Experimental Notes:

The sample number stored in the SCENE TYPE indicates the soil series name and the soil moisture tension (see Table 23.1). The sample letter in the SCENE TYPE indicates the replication. The replications are A, B, C, D, and E. The oven dry samples for replication A are the same samples as those used for the 1/3 bar set for replication A, ... same is true for B, C, D, and E.
